METRONIDAZOLE VAGINAL GEL  
(GENERIC FOR METROGEL)

How to use the medication: 
This medicine is used to treat vaginal infections. This medicine is for vaginal use only. Use once in the evening. Fill the applicator with medication, insert high into the vagina and press the plunger to release the medication. Clean the applicator with warm soap and water and rinse well. Continue using this medication for as long as prescribed to ensure the infection is cleared. Stopping the medicine too early may result in a return of the infection.

If you miss a dose, take it as soon as remembered. If it is almost time for the next dose, take the scheduled dose only. Do not “double-up” the dose to catch up.

Side Effects: 
This medication may cause dizziness, lightheadedness, headache, nausea, stomach cramps, vaginal itching or burning. If these side effects continue contact your clinician.

Precautions: 
• AVOID drinking alcohol during treatment with this medication and for 24 hours before and 48 hours after treatment. Serious side effects such as vomiting, nausea, stomach distress and vision problems may occur.
• No intercourse until the third day after completing the medication.
• This medication will cause a condom to break.

Do not have sexual intercourse during the course of the medication. 
Tell your clinician if you:
• Are pregnant or breast-feeding
• Have any pre-existing seizure disorders, liver condition, nervous system disease.
• Have a liver condition, seizure disorder, nervous system disorder.
• Are taking any blood thinners, disulfiram, over the counter medication or any prescribed medication.
